“Site Reliability Engineer and Kubernetes Specialist dedicated to enhancing system resilience and operational excellence.”

Skills

Programming Languages

Python (Expert), Bash, SQL, JavaScript, TypeScript

Infrastructure & DevOps

Terraform, AWS (EKS, Lambda, Bedrock), GitHub Actions (ARC runner scale-sets), Kubernetes (k3s, RKE2, EKS), ArgoCD

Data Engineering

Apache Iceberg, Delta Lake, DuckDB, Spark, Athena, Dremio, Nessie

API Development

FastAPI, Django API Integration & Management, Microservices Architecture

Virtualization & Containerization

EC2, Harvester HCI (SUSE), Proxmox, Docker, Kubernetes, K3s, RKE2, EKS

GitOps

ArgoCD, Flux, Fleet

Full Stack Development

Django, HTML/CSS, JavaScript, React, Next.js, PostgreSQL, Tailwind, Pocketbase

AI & LLMs

Claude 3.5, GPT-4o, Gemini 1.5 Pro, Llama 3, LangChain, LangGraph, vLLM

RPA & Automation

Robocorp RCC & Model Context Protocol, GitHub Copilot Agents, Cursor IDE, GitHub Actions Workflows

Observability & Security

Prometheus, Grafana, Grafana Loki, OpenTelemetry, IAM, HIPAA compliance, PHI tokenization

Experience

Gainwell Technologies, Conway, AR

Remote

SOFTWARE ENGINEER / SRE

June 2023 – Present

- Re-platformed 20+ UiPath robots into Python Robocorp bots (RCC + MCP), orchestrated via GitHub Actions ARC runner scale-sets on k3s; eliminated license costs and cut run time 45%.
- Built & maintained CI/CD pipelines that push IaC, container images, and ML assets through automated test, security scan, and deploy stages—accelerating release cadence 30%.
- Architected high-performance document summarization service using Claude 3.5 LLM on EKS, leveraging vLLM for inference optimization and KServe for model serving; achieved 3,000 requests/second with sub-200ms latency while reducing manual claim review time by 38%.
- Implemented multi-step RAG workflows with LangGraph and S3-backed vector indexes across 50M+ healthcare records; encryption & tokenization ensure HIPAA alignment while boosting retrieval accuracy 12%.
- Authored Terraform modules that provision on-demand GPU nodes for fine-tuning tasks, lowering compute spend 30%.
- Championed GitHub Copilot & Cursor IDE adoption, trimming average PR turnaround 22% and improving code quality.
- Drove operational readiness reviews and automated compliance gates, contributing to zero findings in the 2025 HIPAA audit.

Gainwell Technologies, Conway, AR

SENIOR DATA ENGINEER / SOFTWARE ENGINEER

June 2022 – May 2023

- Designed a 15 TB Iceberg data lake (Glue ETL → S3 → Iceberg → Athena) that feeds cohort-prediction models surfacing 30% more high-risk Medicaid members one month sooner.
- Built Spark pipelines on EMR that cut mainframe ingest costs 25% and improved SLA compliance.
- Integrated Amazon Bedrock text embeddings into Power BI, enabling natural-language dashboards for 500+ analysts.
- Deployed Django and FastAPI microservices on EKS with ArgoCD + Terraform, enforcing least-privilege IAM and OPA policies.
- Automated Python ETL tooling, tripling throughput on nightly loads.

Lambent Spaces, Boston, MA

IMPLEMENTATIONS SPECIALIST

March 2021 – October 2022

- Directed software implementations, ensuring customer requirements were met through effective network and system configurations.
- Optimized deployment processes, resulting in heightened efficiency and improved customer satisfaction.
- Fostered collaboration with cross-functional teams to refine deployment workflows and procedures.
- Authored and utilized SQL and Python scripts for automation and efficient problem resolution.

CVS HEALTH, Cumberland, RI

DATA ANALYST (DESKTOP SUPPORT)

May 2019 – March 2021

- Designed and deployed O365 Apps for Enterprise across 80k devices, leveraging Python and Excel for efficient reporting and achieving a 30% increase in deployment efficiency.
- Created and maintained business-focused reports using Dash/Plotly, SharePoint, and Excel, driving informed decision-making processes.
- Conducted extensive data normalization from SCCM and Active Directory, ensuring data accuracy and consistency.
- Played a pivotal role in Windows 10 Enterprise Migration, focusing on rigorous testing and quality assurance of developed reports.

SPENCER TECHNOLOGIES, Medway, MA

CLIENT ONBOARDING SPECIALIST

Jan 2017 – Apr 2019

- Implemented the Smartsheet Request Management System, resulting in annual cost savings of \$16k.
- Successfully onboarded new business ventures worth over \$15 million, enhancing company growth and market presence.
- Developed and executed project plans for multiple IT projects, leading teams to successful and timely client launches.

Education

Indiana State University

B.A. IN ENGLISH

Terre Haute, IN

Aug 2006 – June 2008
